kininogen, HMW II precursor - bovine
N;Alternate names: alpha-2-thiol proteinase inhibitor; preprokininogen
N;Contains: bradykinin (kallidin); kininogen I; kininogen II; prokinin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            A;Cross-references: GB:J00010; GB:V00426; NID:g163256; PIDN:AAA30604.1; PID:g163257 C;Comment: The LMW kininogen precursor is produced from the same gene as the HMW form a C;Comment: Kininogen is a cysteine proteinase inhibitor, takes part in initiation of the C;Comment: Bradykinin, released from kininogen by Kallikrein, is a potent vasodilator, C;Comment: Bradykinin, released from kininogen by Kallikrein, is a potent vasodilator, xyproline residue is present in the kininogen prior to the release of bradykinin.
